

TEST REPORT

No. 19-12272-2

Project Name: Plastic Case Max 300

Client: Plastica Panaro Srl
Via Gramsci 438
41054, Marano Sul Panaro (MO)

Involved Persons: Margit Pochendorfer (Plastica Panaro Srl)
Stefanie Bächer (PAConsult GmbH)

Purpose:

By means of a laboratory simulation one shipping unit *Plastic Case Max 300* is tested to transport strains. The test specifications are given by the client and are described in the ATA 300 Revision 2008, Cat. 1 standard [1].

Summary:

All tests were performed successfully. During the tests visible changes could be observed. Single latches unclenched during the drops, but the case in total did not open up. After testing drop edge 1-4 showed abrasion marks. The detailed visual inspection, the final functional tests of the specimen, and the evaluation of the results will be performed by the client.

Date of Delivery: December 04, 2019

Testing Period: December 18, 2019 to January 28, 2020

Pages: 8

Revision: 0
