

## TEST REPORT

### No. 20-13551-B Revision 2

**Project Name:** Plastic Case Max 750H400

**Client:** Plastica Panaro Srl  
Via Gramsci 438  
I-41054, Marano Sul Panaro (MO)

**Involved Persons:** Margit Pochendorfer (Plastica Panaro Srl)  
Martin Richter (PAConsult GmbH)

---

#### **Purpose:**

By means of a laboratory simulation one shipping unit *Plastic Case Max 750H400* is tested to transport strains. The test specifications are given by the client and are described in the ATA 300 Revision 2008, Cat. 1 standard [1].

---

#### **Summary:**

All tests were performed successfully. During the tests visible changes could be observed. Single latches unclenched during the drops but the case in total did not open. One single latch broke. During the testing the drop edges and corners showed abrasion marks. The detailed visual inspection, the final functional tests, and the evaluation of the results will be performed by the client.
